Have a 5- to 13-year-old child?  
Join us in a research study about learning!

Who?  
- Families with 5- to 13-year-old children

What?  
- Kids play fun learning and memory games  
- Parents answer questions about family life  
- Parents and kids give small hair samples to measure the level of a hormone that may be important for development  
- Kids wear an EEG cap that measures brain activity  
- Kids get to see their brain activity displayed on a computer screen

Why?  
- To understand how children’s early experiences and environment affect how they grow and develop

How?  
- One visit to Colorado State University at a time convenient for you

Families will receive $60 for participating  
Plus $5-15 or a small prize for children
